

Forms don't create
paperwork.
Paper creates paperwork.

BREAKFAST SEMINAR

What if you could...

- **Cut the processing of mission-critical forms** from 10 days to 2?
- **Slash costs** by eliminating the need to print or store paper documents?
- **Ensure the security of forms** – from creation to approval to storage?
- **Enhance citizen experience and agency productivity** through user interaction services?

Please join Adobe and IBM to learn how Intelligent Forms integrate seamlessly with IBM's Portal and Content Manager.

Agenda

- | | |
|----------------|--|
| 8:30 AM | Breakfast and Registration |
| 9:00 AM | Welcome and Introduction |
| | Challenges Facing State & Local Government |
| | Overview Adobe Intelligent Document Platform |
| 9:45 AM | Break |

WORKSHOP

Developing for Documents: A technical workshop for developers and IT managers

In this session, you will learn how to leverage XML and Adobe forms design technologies to build intelligent forms in PDF, which can then be deployed in Acrobat or Reader. The session will demonstrate a hands-on standards-based method for easily designing XML forms that can operate across different platforms without imposing new technology requirements on the end-user. Attendees will learn how to use design tools to create intelligent PDF forms that provide improved ways to connect data to forms, especially through the use of XML schemas.
