

Make the most of your time at
SAPPHIRE '05:
Extend the value of your enterprise systems.

Join Adobe Systems and SAP for a one on one discussion with senior management to discuss how enterprises companies can benefit with Adobe Interactive Forms. Leveraging the power of Adobe® Portable Document Format (PDF) and XML, with the ubiquity of Adobe Reader® software, Interactive Forms will enable SAP customers to leverage crucial information resident in SAP systems to extend business-critical information within, and beyond the firewall - to customers, partners, and employees.

You will learn how Interactive Forms based on Adobe® software, now delivered as part of SAP NetWeaver (SAP Web AS 6.40) and mySAP ERP 2004, -will extend forms-based processes and accelerate the flow of business information in round-trip automated processes, available on and offline.

You will also see a demonstration on how to:

- **Drive process change** by capturing information and exchanging data across people and systems in dynamic Interactive Forms
- **Reduce form design and maintenance costs** with Adobe LiveCycle Designer now seamlessly integrated within ABAP Workbench and SAP NetWeaver Developer Studio
- **Reach a broader audience while reducing IT complexity** – easy to read Interactive Forms are viewable via the ubiquitous Adobe Reader

To book your 1:1 meeting, please call your account manager or 408-536-6294.

If you are not able to meet with us, please stop by the Adobe booth #365 at SAPPHIRE to see a live demonstration of Interactive Forms based on Adobe software.
